

DocPop Integration

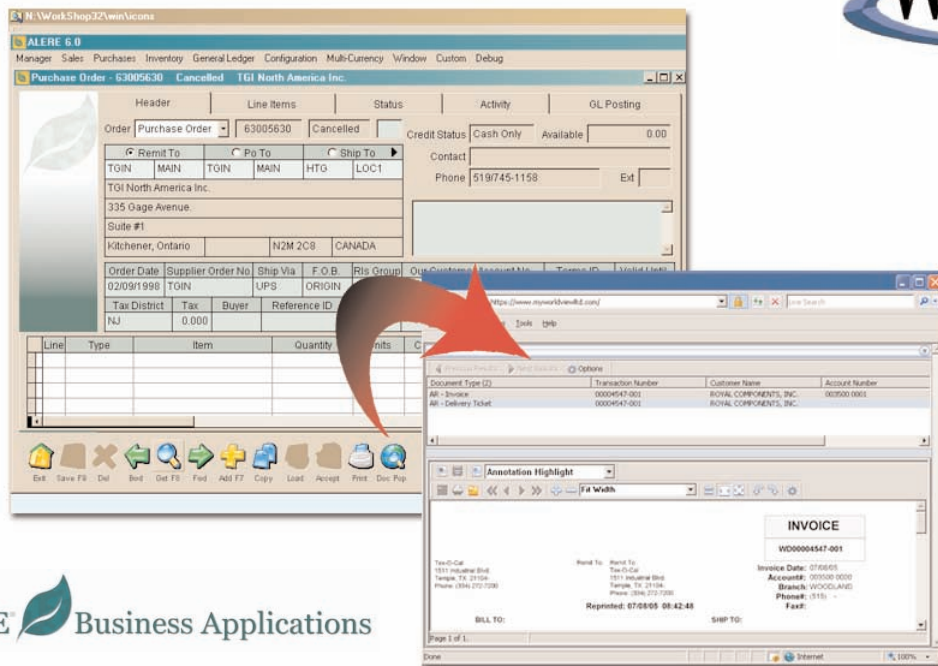

Quick Retrieval Within ALERE

DocPop integration allows your organization to integrate the search and retrieval features offered in WorldView's solution, with a single click of a button, directly from the ALERE Business Application facilitating quicker document retrieval and convenience.

If you have a need to frequently reference scanned documents while working in ALERE software, your company will benefit from WorldView's DocPop capabilities. In addition to the convenience of using only one application, you will work more efficiently from the familiarity of the ALERE Business Application.

How it works:

Simply click the WorldView button to quickly view images of related documentation stored in the WorldView repository. Save time and improve productivity without ever leaving the ALERE Business Application.

ALERE  Business Applications

Productivity Happens with WorldView:

DocPop Integration Enables:

- Better Use of Manpower Resources
- Improved Customer Service
- Increased Productivity
- Governmental Compliance
- Cost Savings

TIW
TECHNOLOGY

Simplified Search: In combination with quick document retrieval through DocPop, WorldView also gives you quick access to related documents through cross-referencing. Simply double click on the document to get a list of all documents that are associated with your current view.

Disaster Recovery: Your documents are secure with the ALERE and WorldView partnership because Disaster Recovery and Data Redundancy are included. Your documents are stored in a secure facility, on multiple servers that are backed up on a daily basis. This provides the safest environment for your documents and folders. Natural disasters, fires, floods, power outages and human error are worries of the past!
